SIEMENS

Integration, integration, integration

- First pure VoIP to turret solution
- True workflow integration
- Open technology for tailoring to your existing communications environment
- Easy voice playback
- Hoot and holler, intercom and broadcast
- Barge-in and line conferencing
- Touch screen and hard keys
- Supports legacy TDM systems
- Full migration path to SIP architecture

HECTOR stands for High End Communication Terminal with Open Range.

But what does this actually mean for your business? The answer is a new hard turret for trading that radically raises the bar in multimedia communication platforms.

Now, by integrating your most important applications through a single screen, each trader on your floor can

access the diverse applications they rely on to make their decisions, from phone to instant messaging to market data, CRM and beyond.

By simplifying access to key information, HECTOR helps traders make the right decisions, faster. And because the system also facilitates back office collaboration, the entire trading process becomes quicker and more efficient, with far less likelihood of errors being made.

Open technology for today, tomorrow, forever

With HECTOR, each of your traders can access every information source they call upon to make their decisions via a 10.4" inch screen.

Programmable keys allow short cuts for key functions, while each trader can also customise their HECTOR unit by adding extra modules, including:

- Up to 4 handsets
- Up to 16 speaker channels per turret
- Gooseneck (for hands-free talking)
- Headsets
- Audio Monitoring and voice detection
- Broadcasting and Intercom

Silent, secure and clutter-free

The HECTOR unit is ergonomically designed for ease of use, and offers both touchscreen and hard keys. It also boasts excellent fail-safe features as it contains no fan or hard disk.

The result is the perfect work tool, revolutionising a trader's access to information and streamlining business-critical processes through enhanced collaboration.

HECTOR standard features include:

- Multifunctional, modular terminal
- Integrated Intel Celeron Processor
- Windows XP embedded
- High contrast 10.4" Touch screen
- No fan for reliability and silent operation
- Two redundant LAN connections
- Six USB v2.0 connectors
- Two built in loudspeakers
- Adjustable viewing angle (20° to 60°)
- 20 configurable hard keys
- No Hard Disk for increased security

Siemens Enterprise Communications GmbH & Co. KG

Siemens Enterprise Communications GmbH & Co. KG is one of the world's leading vendors of Open Communications solutions for enterprises of all sizes, enabling business processes to be more productive, faster and more secure - with any device, network or information technology infrastructure. The company is a wholly owned subsidiary of Siemens AG with 17,000 employees globally and headquarters in Munich.
